RE: Weyburn Road Concrete Channel Repair
Stormwater Management Variance
Back River Watershed
EPS Project I.D. M180047
EPS Tracking Number: 06-18-2664

Dear Ms. Searing:

Grading plan review is required for this project as is a sediment and erosion control plan approved by the Soil Conservation District.

This office has reviewed the information submitted and finds that a stormwater management variance can be granted for this project under Section 33-4-113 (a) (2) of Title 4 of the Baltimore County Code. This section of the regulations allows a stormwater management variance to be granted if there are exceptional circumstances such that strict adherence to the provisions of this article would result in unreasonable hardship or practical difficulty and not fulfill the intent of the regulations.

This project is for the repair/replacement of a concrete channel. Although the disturbed area is in excess of 5,000 square feet, there will be a 54% decrease in impervious area as a result of this project.

Please contact Michael P. Doyle of my staff at 410-887-3768 should you have any questions.

Very truly yours,

/signed/
